

EQ23110X-3LID80

100G QSFP28 ZR4 Optical Transceiver

PRODUCT FEATURES

- Support line rates from 103.125Gb/s to 111.8Gbps;
 - Transmission data rate up to 27.95Gbps per channel
 - Up to 80km transmission with KR4-FEC.
 - LAN WDM EML laser and PIN receiver with SOA;
 - Support Multi-Pin function with IntL/RxLOSL and LPMODE/TxDIS;
 - High speed I/O electrical interface (CAUI-4);
 - I2C interface with integrated Digital Diagnostic monitoring;
 - QSFP28 MSA package with duplex LC connector;
 - Single +3.3V power supply
- Power dissipation
- Commercial: < 4.5W
- Industrial: <6W
- Complies with EU Directive 2015/863/EU

APPLICATIONS

- 100G Datacom& Telecom connections
- ITU-T G.959.1 OTU4 (4L1-9D1F)
- 100GBASE-ZR4 Ethernet

Description

ETU-LINK's EQ23110X-3LID80 is designed for 80km optical communication applications. Optical transceiver integrates the transmit and receive path onto one module. On the transmit side, four lanes of serial data streams are recovered, retimed, and passed on to four laser drivers, which control four electric-absorption modulated lasers (Lan-WDM) with 1296, 1300, 1305, and 1309 nm center wavelengths. The optical signals are then multiplexed into a single-mode fiber through an industry-standard LC connector. On the receive side, four lanes of optical data streams are optically DE multiplexed by an integrated optical DE multiplexer. After the optical signal is amplified by SOA, DEMUX separates four channels which are recovered by PIN photodetector and cross-impedance amplifier, retimed and passed on to an output driver. This module features a hot-pluggable electrical interface, low power consumption, and 2-wire serial interface.

Notes:

1. The product name is EQ23110X-3LCD80.

2. The product name is EQ23110X-3LID80.
3. Optical fiber use 9/125um SMF.

II、Absolute Maximum Ratings

It has to be noted that the operation in excess of any individual absolute maximum ratings might cause permanent damage to this module.

Parameter	Symbol	Min	Max	Unit	Notes
Storage Temperature	TS	-40	85	degC	
Operating Case Temperature	TOP	-40	85	degC

VII、 QSFP28 Module EEPROM Information and Management

Digital diagnostics monitoring function is available on all ETU-LINK QSFP28 module. A 2-wire serial interface provides user to contact with module.

The structure of the memory is shown in Figure 3. The memory space is arranged into a lower, single page, address space of 128 bytes and multiple upper address space pages. This structure permits timely access to addresses in the lower page, such as interrupt Flags and Monitors. Less time critical time entries, such as serial ID information and threshold settings, are available with the Page Select function.

The interface address used is AOxh and is mainly used for time critical data like interrupt handling in order to enable a one-time-read for all data related to an interrupt situation. After an interrupt, IntL, has-been asserted, the host can read out the flag field to determine the affected channel and type of flag. For detail EEPROM information, please refer to the related document of SFF-8636_R2.10a.

Notes:

1. GND is the symbol for signal and supply (power) common for the QSFP28 module. All are common within the QSFP28 module and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal-common ground plane.
2. Vcc Rx, Vcc1 and Vcc Tx are the receiver and transmitter power supplies and shall be applied concurrently. Requirements defined for the host side of the Host Edge Card Connector are listed in MSA. The connector pins are each rated for a maximum current of 1000 Ma.

VIII、 Laser Safety

This is a Class 1 Laser Product according to EN 60825-1:2014. This product complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated (June 24, 2007).

Caution: Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

IX、 ESD

This transceiver is specified as ESD threshold 1KV for high speed data pins and 2KV for all others electrical input pins, tested per MIL-STD-883, Method 3015.4 /JESD22-A114-A (HBM). However, normal ESD precautions are still required during the handling of this module. This transceiver is shipped in ESD protective packaging. It should be removed from the packaging and handled only in an ESD protected environment.
